ABOUT ME

As an aspiring Software engineer, I have worked towards enhancing my skills of project management, technical documentation, multitasking and problem solving through hands-on experience.

EDUCATION

SECONDARY SCHOOL

ST MARY'S HIGH SCHOOL

Year of Passing- 2020

BACHELOR OF TECHNOLOGY

ANJUMAN INSTITUTE OF TECHNOLOGY

Currently in the third of engineering.

SKILLS

- Public speaking
- Front End Coding
- Technical Documentation
- AI/ML
- Problem Solving
- Video Photo Editing

MY HOBBY

- Writing
- Reading
- Football
- Content Creation

PROJECTS

CAR PRICE PREDICTION SYSTEM

PROJECT DESCRIPTION

Python, ML

- Made a car price prediction system using python and its libraries along with some applications like NumPy, Jupiter notebook and front end made with html and CSS.
- This project helped us to predict prices for old and used cars.

PYTHON PROJECTS

BASIC PYTHON PROJECTS

- Created games using Python in the initial stages of engineering.
- Games examples such as Tic tac, Snake game and number guessing.
